Of Secondary

By

Mr. Dibakar Pal, M. Phil^{1*}

Retired Executive Magistrate (Civil Servant in India) & Independent Scholar

Abstract: In case of love, lover is primary, and love is secondary. Love is available but lover is not available. Lover is unique. Love is not unique. Love is abstract and intangible. Lover is concrete and tangible in nature. Here touch is the main factor of mundane love. As such presence of concerned lover is important more and primary in nature. And lover concerned is considered as secondary category. A genuine lover loves a primary lover, never a secondary one. To the romantic soul secondary lover is not a lover at all. So, question of reciprocation, from a secondary lover, does not arise at all, since love is not a one-sided game rather a bi-partite issue.

Keywords: Secondary, less important, primary

Introduction

Creative writing is based more on manifestation rather than on expression. It does not inform, rather it reveals. So, it bears no reference. The best creative writing is critical, and the best critical writing is creative. This article is an outcome of thinking about creative writing meant for a general readership. As such, I have adopted a free style methodology so that everyone can enjoy the pleasure of reading. As you might know, Francis Bacon (1561-1626), the immortal essayist, wrote many essays namely 'Of Love', 'Of Friendship', 'Of Ambition', 'Of Studies', and so on. The multiple-minded genius correctly pointed out that all the words in the dictionary can be used as themes for essays. But little has been done since his death to continue or finish his monumental task. Bacon's unique individual style of presentation ignited my imagination and encouraged me to write creative essays as a method of relieving a wide range of emotions through catharsis.

Article

Secondary is less important than related things. For example: The need for secrecy is secondary to the need to take immediate action.

It is developing from something similar that existed earlier. For example: The drug is not very effective against AIDS, though it may be used to treat secondary viral infections.

It relates to the education of children approximately between the ages of 11 and 18 years old e.g., secondary education. They receive state money to train secondary teachers.

In finance and stock market it is used to describe the trading of existing bonds, shares, etc. rather than new ones. For example: Mortgage securities were mixed in secondary trading.

In chemistry it is of an organic compound having its functional group located on a carbon atom which is bonded to two other carbon atoms.

In physics it is a secondary coil or winding in an electrical transformer.

Thus, secondary is coming after, less important than, or resulting from someone or something else that is primary. For example: The plot is of secondary importance: what matters most is the relationships between the characters.

Secondary is a relative concept. The situation renders something primary or secondary. What is secondary in a

moment may be primary in the very next moment and vice versa. It is quite a matter of perception. The outcome of perception depends on judicious decisions. Judiciousness saves someone from dangers as they are faced with. All are not of equal merit. As such, all cannot tackle hurdles of life equally. So, all are not equally happy in real life.

Food, cloth and shelter are three basic human needs. Among these three items food is primary and is a must. Cloth and shelter are secondary. Between cloth and shelter sometimes cloth is primary, and shelter is secondary and sometimes cloth is secondary, and shelter is primary. The choice depends upon the person concerned or person concerned.

Both hunger and sex desire are basic instincts of human being. If both are available and option is asked, then someone will opt for food and someone will opt for sex. It is quite a complex issue. A hungry person who cannot move due to weakness will ask for food. In contrast, a hungry person who has much desire for sex will join for sexual enjoyment considering sexual enjoyment may not be available, but food can be procured. To him, collecting food is easier than a partner. Managing a partner and subsequent enjoyment are quite risky involvement.

To an inattentive student, study is secondary and playing is primary. In the case of attentive students, it is just the reverse. As such an inattentive student reads if he likes. He reads not if he likes not. Thus, his mood and motive are gloriously so uncertain. Here lies the importance of guidance. Serious parents take care of their issues sincerely. Teachers guide them properly. Any negligence of the tender mind causes severe damage to the career.

A tree of the garden grows up with the tender touch of the affectionate gardener. Without care of the gardener the tree cannot stand erect rather withered away. Similar is the case of human beings. Childhood is the most important period of human life. Unguarded childhood coupled with unshaded infants render a child prodigal. Such a prodigal child becomes a headache to its family thereby society and nation at large.

A welfare state considers its children and senior citizens as elite class. To such a society they are primary and young generation is secondary who needs not so much care. Children are taken care of to get better future citizens. To be old it is a tribute who toiled much to build the society. Repayment of debt is its essence.

The old constructed the base upon which the present generation exists. Only wise people can recognize their sincere efforts towards society. Young is bold but old is

gold. The message of old age is just like the last rays of the setting sun having inner coupled with deep significance.

Due to inclination towards secondary affairs a grown-up youth becomes unsuccessful. The person may be a genius. He may be diverted as well. Then such a diverted genius may be a misguided missile. He is either dangerously brilliant or brilliantly dangerous or both simultaneously. It is the outcome of negligence towards prime objective.

Original is primary. Standby is secondary. If original goes out of order or is missing, then to overcome the urgency or crisis standby support becomes primary. If standby alternative is effective more then it becomes primary. If secondary things are easily available, then it is considered as primary. Such availability is a very crucial factor.

Polygamy gives birth to secondary wives. My first wife is a primary school student. In the course of time, she loses attraction from her husband. The second wife appears on the stage. Then the first wife becomes secondary, and the second wife becomes the primary source of attraction. By courtesy of patriarchal society, very soon, the present primary wife becomes secondary, and the secondary becomes tertiary and so on. It is an endless drama of inertia. Here lies the paradox of first and second i.e., primary and secondary. None knows the tenure of good luck of the primary wife. None knows what is in the lot.

Thus, the primary attraction is temporary, likely to be permanent. In fact, in every sphere of life all is temporary and its permanence depends on the likeness of the big boss. The boss sometimes likes. The boss sometimes likes not. The boss follows no rules at all. Also, he does not care about any rules. He contends that what he does is rule. He does not obey any rules. Rather he argues that rule should follow him. He is such a daring devil.

Someone prefers cash. Someone prefers kind. A judicious person is always so kind that he always accepts cash. Where cash is easily available, their kind becomes primary source of attraction and cash becomes secondary.

To a lover love is primary. Life is secondary. Love renders the lover blind. He who gambles with money is a gambler. He who gambles with life is a great gambler. A lover belongs to the second category. The second category experiences secondary valuation in the market.

Further, in the case of love, lover is primary, and love is secondary. Love is available but lover is not available. Lover is unique. Love is not unique. Love is abstract and intangible. Lover is concrete and tangible in nature. Here touch is the main factor of mundane love. As such presence of concerned lover is important more and primary in nature. And lover concerned is considered as secondary category.

A genuine lover loves a primary lover, never a secondary one. To the romantic soul a secondary lover is not a lover at all. So, the question of reciprocation, from a secondary lover, does not arise at all, since love is not a one-sided game rather a bi-partite issue.

Love has a substitute. As such love can be replaced. Lover has no substitute. Naturally, lovers cannot be replaced. To a romantic heart concerned lover itself is its substitute. As such, the lover is too obsessed to face honor killing even. Lover is so touchy. Touch of concerned lover is so unique that thousand touches of other thousand different lovers hardly can compensate the thirst of the concerned thirsty lover. As such a lover can give up everything for the sake of lover but never lover instead of anything.

Conclusion

Man faces so many situations simultaneously. Here choice of options is very important for his mere existence. One must decide on the primary and secondary job and proceed accordingly. This decision is liable for rise or downfall. Also, from the decision intellect thereby state and status of the person concerned can be ascertained. It is a very vital factor in human life. Here lies the uniqueness of primary. Here lies the difference between secondary things and thinking as well.
