ABSTRACT: The GDP (gross domestic product) is to be enhanced by us due to promoting its usefulness in our many aspects like expenditure incoming and leisure entertainment depended on our individual interesting that may increase our happiness and healthy curing & caring bad status like in hospital if we get catch cold etc. Therefore, we need to earn money from our working occupation continuously like company school & investment where the salary per month is obtained by us so as to maintain our daily and heavily expense. We should accept the entertainment influence to our mood control with calming down so we often go to restaurant and hotel to spend leisure time to our bodies due to its recovering our body & heart even the spiritual health. Therefore, we need more money to live advanced one place to pass our leisure time with clean room and good cuisine besides retaining good sleep after watching fashion clothes too. The expenditure may bring up new tendency that helps us to fill up the normal and positive mood to work then due to obtaining higher GDP value. The unit that will make us to be rich- men is really hard and difficult task for us to learn and use the reasonable course to make the work with becoming interesting place to go almost five days one week. We should learn and upgrade new knowledge and technique skill in order to make it more achievement by our endeavour and insistence. All of our behavior and judgement can make the live more beneficial and make more money with some prize sometimes monthly and yearly. With regards to welcoming new world of artificial intelligence machine like auto-vendors that includes the automatic composition inside its internal-structure which makes our buying behavior more preciously, quickly and conveniently like payment action by visiting one face. We should continue to search and develop many of them applied to the current leisure occasions for us to enjoy enough through buying its goods like many kinds of the cigarette & beers in visible place in hospital roadside & community. Therefore, the sell & buy actions may let us fill with enough goods with quickly transacting course than human being because we just scan its two-dimensions bar code and determine the last payment button in monitor. So many of such AI machines have to change our daily life with less complaints and precise transformation action helped by those payment machines. On the other hand, the engineer must publish his cherish paper periodically like one paper speed within one-three months, so that there will be six~ten papers one year that may be published & peered reviews by editors in Journal Publisher. Certainly if there will be chances the sophisticated SCI (science cited index) & EI (engineering index) journals often are published that may

influenced by the peers and may be cited by them as well if the similar theme appeared in the narration of those papers. Thereby, the enough high-technological achievement could be made by our scientists for revealing the internal attribution and finding outside our vision like quantum technique, drug compositions, astronautic exploration & 3-Dimensions print too.

Keywords: *Reviving the China & EU industrial strength, subject for the International Journal of Business Research and Management, Behavior & Judgement, by sustainability, an innovated searching.*

1.Introduction

The potential talents need to be emphasized and trained a periodical education experience so as to raise the competition capacity each other that will take up the usefulness methods to be birthed constantly. The collaborative combination and cooperative spirit will be advocated by us so as to make an innovative item like software program making capacity besides hardware searching and exploration. From the composition to the performance the series experimental with a series of processing stages like combining compositions, processing, evaluating, processing again, evaluating longevity & making product and brain judgement like modeling erection with principle formula will indicate that first one factor to determine the predicting performance result and longevity. So we should investigate broadly and clarify the key points and then start our theoretical modeling exhibition with the help of experimental proof that may bring out many chances for us to process continually.

Meantime, the investment behavior may be proceed by the similar method with experiment and judgment capacity. The first experiment will be done several thousand stocks in exchange center use portfolio combining strategic plan and then after some time the evaluating its earning will be expressed, and the goodness with AI investment machine and mathematical deduction modeling to analyse the price changes even vibration. Thereby, the financial innovation will make us to be a rich- man that contributes to the tertiary industry enhancement eventually and ultimately. Hence, the reformation idea will occupy the first and important factor for us to master its behavior and judgement like financial one that may bring us more beneficial capital than ever because of the quantization investment and

evaluating stock price within 5 thousand stocks. Thereby, the stocks evaluating system will be more prevalent and urgent for our constitution investment behavior. There are so many tips to tell us following the main capital to win the game that is like a fairy tale story under the help of AI (artificial intelligence) machine.

At the same time, the nations industry advancement will influence our life level like 16° electric consumption per people per day in China 2025. The more energy electric generator has to be increased gradually year by year so as to raise our GDP value eventually besides giving us more comfortable even convenience above 10 times to catch up the USA developed level. Let us do best endeavour to raise our mission for improving GDP value under cooperation and collaboration spiritual courage within R & D dept (research & development department) and laboratory scope that is to become our diligent destination as to so many scientist and scholars. The better way to be successful is still made by ourselves in different occupations that may create huge power to push the high-technique forwards sustainably whilst the achievement can be published in a journal with fluently English narration once we had any spiritual inspirations. [1~22]

2. Discussions

The GDP as an indicator may play an important role in every aspects of nation and region economic activities, so that the emphasis on it will become a necessary factor for us to evaluate continually. For example the expenditure and incoming balance which may influence the national economic activities like visiting various regions in a country would afford a higher expense booming including the restaurant eating style & buying souvenir etc. many aspects besides the double-flight-fee. Therefore, the more income will be necessary accounting for high-technique working occupation that may bring us up the enough income for us to prepare to enjoy a travel happiness. On the other hand, the industrial producing amount will enhance the working opportunities with increasing high-technique graduates and talents in others employment rate a certain degree that may raise that GDP value absolutely. [21, 22]

2.1 International Journal of Business Research and Management

As to the Dr and researchers we are greetings from International Journal of Business Research and Management. We extend a warm invitation to you to contribute an

unpublished manuscript for publication in our upcoming issue. We are delighted to update you that IJBRM is planning to release Volume 04 Issue 5 by the end of this month. We can accept Research article/Review/Case Report/ Events/Pilot study or any type of article. I appreciate your professionalism and knowledge after a view at your published article entitled: “An Innovation Study of Chinese Exports and Imports and Its Electrical Appliances on Economy”. We would greatly appreciate it if you could submit your manuscript by July 24th, 2026. If your manuscript is prepared and ready for submission, please submit it via our email to be onlinesubmissionsystem (or) info.aditumonlinepublications@gmail.com, Please note that if you want to become a member of the Editorial Board, a minimum requirement of either a Ph.D. or M.D. is necessary. Your affirmative response to our invitation would be highly valued. We eagerly anticipate your submission. Its Indexing Platforms: ICI, Google Scholar, Cross Ref, DRJI, Publons, Cite Factor, ARI, ICMJE, Scilit, ISI, DRJI, SIS, World Cat, and PubMed. [1]

2.2 China &EU industrial strength

The China & EU industrial strength analysis might exhibit 1,239~275 billion dollars by China~ USA correspondingly in 1998 according to the Figure 1 to realize the China forwards economic momentum. Additionally, the y-y value would exhibit around 1% by them indicated their down-moderate developed step. In contrast, the India maintained the modest 2% y-y value then whilst the EU remained near 0 growth step.

Figure 1 China & EU industrial strength analysis. [2]

The China & EU industrial strength analysis might exhibit 708~336 billion dollars by China~ France correspondingly in 2002 according to the Figure 2 to realize the China forwards economic momentum. Additionally, the y-y value would exhibit around 13 % by them indicated their higher developed step. In contrast, the Germany maintained the modest 13 % y-y value as well then.

Figure 2 China & EU industrial strength analysis I. [2]

Moreover, the China & EU industrial strength analysis might exhibit 224~88 billion dollars by Espain~ Swiss correspondingly in 2002 according to the Figure 3 to realize the Espain forwards economic momentum. Additionally, the y-y value would exhibit 20%~ 12% by them accordingly indicated their high developed step. In contrast, the Netherlands remained the modest 13% y-y value then.

Figure 3 China & EU industrial strength analysis II. [2]

Furthermore, the China & EU industrial strength analysis might exhibit 70 billion dollars & 83 billion dollars by Sweden & Russia correspondingly in 1998 according to the Figure 4 to realize the Russia forwards economic momentum. Additionally, the y-y value would exhibit 6.5% &-10% by them accordingly indicated the higher developed step.

Figure 4 China & EU industrial strength analysis III. [2]

At the end, the China & EU industrial strength analysis might exhibit 95~80 billion dollars by Netherlands~ Swiss correspondingly in 1998 according to the Figure 5 to realize the Netherlands forwards economic momentum. Additionally, the y-y value would exhibit around 2% &-0.9% by them accordingly indicated the Netherlands moderate developed step while the Swiss maintained the minus y-y value then.

Figure 5 China & EU industrial strength analysis IV. [2]

In the sum, the GDP (gross domestic product) will affect our country level and quality that may change our life style because the high-technique product enters our daily life every a second. We should appreciate the engineers and experts to take out new technology for us to share due to combining many high-techniques software skill to make the complete product more advancement and industrialization that may destroy the traditional economy eventually. The renewable energy like photovoltaic generator, wind turbine one, nuclear generator, hydrogen fuel & carbon one etc. new source one will be exploited by us continually to exhibit its power in front of public. On the other hand, the heat-supplier will be regulated by one house in a building with increasing and decreasing button completing electric releasing role. In the developed country it is essential function, so if you go out to let the heat decrease and when you turn back making it to increase room temperature for the sake of maintaining a normal situation in winter.

3. Conclusions

The GDP (gross domestic product) is to be enhanced by us due to promoting its usefulness in our many aspects like expenditure incoming and leisure entertainment depended on our individual interesting that may increase our happiness and healthy curing & caring bad status like in hospital if we get catch cold etc.. Therefore, we need to earn money from our working occupation continuously like company school & investment where the salary per month is obtained by us so as to maintain our daily and heavily expense. We should accept the entertainment influence to our mood control with calming down so we often go to restaurant and hotel to spend leisure time to our bodies due to its recovering our body & heart even the spiritual health. Therefore, we need more money to live advanced one place to pass our leisure time with clean room and good cuisine besides retaining good sleep after watching fashion clothes too. The expenditure may bring up new tendency that helps us to fill up the normal and positive mood to work then due to obtaining higher GDP value. The unit that will make us to be rich- men is really hard and difficult task for us to learn and use the reasonable course to make the work with becoming interesting place to go almost five days one week. We should learn and upgrade new knowledge and technique skill in order to make it more achievement by our endeavour and insistence. All of our behavior and judgement can make the live more beneficial and make more money with some prize sometimes monthly and yearly. With regards to welcoming new world of

artificial intelligence machine like auto-vendors that includes the automatic composition inside its internal-structure which makes our buying behavior more preciously, quickly and conveniently like payment action by visiting one face. We should continue to search and develop many of them applied to the current leisure occasions for us to enjoy enough through buying its goods like many kinds of the cigarette & beers in visible place in hospital roadside & community. Therefore, the sell & buy actions may let us fill with enough goods with quickly transacting course than human being because we just scan its two-dimensions bar code and determine the last payment button in monitor. So many of such AI machines have to change our daily life with less complaints and precise transformation action helped by those payment machines. On the other hand, the engineer must publish his cherish paper periodically like one paper speed within one~three months, so that there will be six~ten papers one year that may be published & peered reviews by editors in Journal Publisher. Certainly if there will be chances the sophisticated SCI (science cited index) & EI (engineering index) journals often are published that may influenced by the peers and may be cited by them as well if the similar theme appeared in the narration of those papers. Thereby, the enough high-technological achievement could be made by our scientists for revealing the internal attribution and finding outside our vision like quantum technique, drug compositions, astronautic exploration & 3-Dimensions print too.
