ABSTRACT: The GDP (gross domestic product) is to be enhanced by us due to promoting its usefulness in our many aspects like expenditure incoming and leisure entertainment depended on our individual interesting that may increase our happiness and healthy curing & caring bad status like in hospital if we get catch cold etc. Therefore, we need to earn money from our working occupation continuously like company school & investment where the salary per month is obtained by us so as to maintain our daily and heavily expense. We should accept the entertainment influence to our mood control with calming down so we often go to restaurant and hotel to spend leisure time to our bodies due to its recovering our body & heart even the spiritual health. Therefore, we need more money to live advanced one place to pass our leisure time with clean room and good cuisine besides retaining good sleep after watching fashion clothes too. The expenditure may bring up new tendency that helps us to fill up the normal and positive mood to work then due to obtaining higher GDP value. The unit that will make us to be rich-men is really hard and difficult task for us to learn and use the reasonable course to make the work with becoming

interesting place to go almost five days one week. We should learn and upgrade new knowledge and technique skill in order to make it more achievement by our endeavour and insistence. All of our behavior and judgement can make the live more beneficial and make more money with some prize sometimes monthly and yearly. With regards to welcoming new world of artificial intelligence machine like auto-vendors that includes the automatic composition inside its internal-structure which makes our buying behavior more preciously, quickly and conveniently like payment action by visiting one face. We should continue to search and develop many of them applied to the current leisure occasions for us to enjoy enough through buying its goods like many kinds of the cigarette & beers in visible place in hospital roadside & community. Therefore, the sell & buy actions may let us fill with enough goods with quickly transacting course than human being because we just scan its two-dimensions bar code and determine the last payment button in monitor. So many of such AI machines have to change our daily life with less complaints and precise transformation action helped by those payment machines. On the other hand, the engineer must publish his cherish paper periodically like one paper speed within one~three months, so that there will be six~ten papers one year that may be published & peered reviews by editors in Journal Publisher. Certainly if there will be chances the sophisticated SCI (science cited index) & EI (engineering index) journals often are published that may influenced by the peers and may be cited by them as well if the similar theme appeared in the narration of those papers. Thereby, the enough high-technological achievement could be made by our scientists for revealing the internal attribution and finding outside our vision like quantum technique, drug compositions, astronautic exploration & 3-Dimensions print too.

Keywords: *Reviving the China & EU industrial strength, stocks vibrations, by sustainability, an innovated searching.*

1. Introduction

The potential talents need to be emphasized and trained a periodical education experience so as to raise the competition capacity each other that will take up the usefulness methods to be birthed constantly. The collaborative combination and cooperative spirit will be advocated by us so as to make an innovative item like software program making capacity besides hardware searching and exploration. From the composition to the performance the

series experimental with a series of processing stages like combining compositions, processing, evaluating, processing again, evaluating longevity & making product and brain judgement like modeling erection with principle formula will indicate that first one factor to determine the predicting performance result and longevity. So we should investigate broadly and clarify the key points and then start our theoretical modeling exhibition with the help of experimental proof that may bring out many chances for us to process continually.

Meantime, the investment behavior may be proceed by the similar method with experiment and judgment capacity. The first experiment will be done several thousand stocks in exchange center use portfolio combining strategic plan and then after some time the evaluating its earning will be expressed, and the goodness with AI investment machine and mathematical deduction modeling to analyse the price changes even vibration. Thereby, the financial innovation will make us to be a rich-man that contributes to the tertiary industry enhancement eventually and ultimately. Hence, the reformation idea will occupy the first and important factor for us to master its behavior and judgement like financial one that may bring us more beneficial capital than ever because of the quantization investment and evaluating stock price within 5 thousand stocks. Thereby, the stocks evaluating system will be more prevalent and urgent for our constitution investment behavior. There are so many tips to tell us following the main capital to win the game that is like a fairy tale story under the help of AI (artificial intelligence) machine.

At the same time, the nations industry advancement will influence our life level like 16° electric consumption per people per day in China 2025. The more energy electric generator has to be increased gradually year by year so as to raise our GDP value eventually besides giving us more comfortable even convenience above 10 times to catch up the USA developed level. Let us do best endeavour to raise our mission for improving GDP value under cooperation and collaboration spiritual courage within R & D dept (research & development department) and laboratory scope that is to become our diligent destination as to so many scientist and scholars. The better way to be successful is still made by ourselves in different occupations that may create huge power to push the high-technique forwards sustainably whilst the achievement can be published in a journal with fluently English narration once we had any spiritual inspirations. [1~20]

2. Discussions

The GDP as an indicator may play an important role in every aspects of nation and region economic activities, so that the emphasis on it will become a necessary factor for us to evaluate continually. For example the expenditure and incoming balance which may influence the national economic activities like visiting various regions in a country would afford a higher expense booming including the restaurant eating style & buying souvenir etc. many aspects besides the double-flight-fee. Therefore, the more income will be necessary accounting for high-technique working occupation that may bring us up the enough income for us to prepare to enjoy a travel happiness. On the other hand, the industrial producing amount will enhance the working opportunities with increasing high-technique graduates and talents in others employment rate a certain degree that may raise that GDP value definitely. [21, 22]

2.1 China & Japan warship tons strength

The China & Japan warship tons strength analysis might exhibit 161~147 billion dollars by Japan & China correspondingly in 1985 according to the Figure 1 to realize the Japan forwards economic momentum. Additionally, the y-y value would exhibit 6%~4% by them accordingly indicated the Japan upwards developed step.

Figure 1 The Japan & China warship tons analysis. [1]

The Japan & China warship tons analysis might show 105 thousand tons & 97 thousand tons by Japan & China in 1975 correspondingly according to the Figure 2 exhibited the

Japan a little forwards warship enterprises. The y-y value would show -13% & 2.2% by them accordingly to indicate the China upwards developed step then.

Figure 2 The Japan & China warship tons analysis I. [1]

2.2 The average salary situation per year on cities & towns in 2025

The average salary situation per year on cities & towns in 2025 with private units analysis might show 5.7 ten thousand yuan~7 ten thousand yuan by Jiangxi province~ Fujian ones correspondingly according to the Figure 3 exhibited the Fujian province forwards economic level & momentum. The non-private ones value would show 9.9 ten thousand yuan~11.6 ten thousand yuan by them accordingly to indicate the Fujian one most upwards developed strength.

Figure 3 The average salary situation per year on cities & towns in 2025 analysis. [2]

2.4 Five Chines cities developed status

The five Chines cities developed analysis might show 9.2 billion yuan & 5.9 billion yuan by Tianjin~ Nanjing in 1993 correspondingly according to the Figure 4 exhibited the Tianjin city forwards economic momentum. The y-y value would show 34%~40,3% by Tianjin~ Hangzhou accordingly to indicate the Chengdu city least upwards developed step with 27% step.

Figure 4 The five Chines cities developed status. [3]

2.5 Introducing the WAR Journal of Multidisciplinary Bulletin

As to readers we will provide WARJMB targets researchers, practitioners, policymakers, and students seeking multidisciplinary perspectives and solid empirical or theoretical contributions. Authors from all geographic regions are welcome; the journal encourages submissions that are globally relevant or that illuminate regional research of wider significance. Editorial standards may indicate WARJMB maintains rigorous editorial and ethical standards. All submissions undergo initial editorial screening and a documented peer-review process. The journal is committed to transparency, research integrity, and adherence to recognized ethical guidelines. (Full details of peer review, editorial policy, ethics, and integrity are available on the Policies page.) How to submit will involves in authors should prepare manuscripts following the journal's Author Instructions and submit via the Manuscript Submission page. Submissions must be original and not under consideration elsewhere. For questions about suitability or scope, contact the editorial office. The related pages includes Archives — past and current issues and article listings;

Policies — central hub for Author Instructions; Peer Review & Editorial Policy; Ethics & Integrity; APCs & Waiver Policy; Copyright & Licensing; Indexing & Archiving; Open Access Policy; About — editorial board, privacy statement, retraction notices; Manuscript Submission — submission form and instructions; Reach Us — detailed contact and support. Therefore, we delight to invite you to submit your cherish papers to us for the sake of contributing to our each other, and we are to publish your one quickly and cheaply after peer reviews. [5]

3. Conclusions

The GDP (gross domestic product) is to be enhanced by us due to promoting its usefulness in our many aspects like expenditure incoming and leisure entertainment depended on our individual interesting that may increase our happiness and healthy curing & caring bad status like in hospital if we get catch cold etc. Therefore, we need to earn money from our working occupation continuously like company school & investment where the salary per month is obtained by us so as to maintain our daily and heavily expense. We should accept the entertainment influence to our mood control with calming down so we often go to restaurant and hotel to spend leisure time to our bodies due to its recovering our body & heart even the spiritual health. Therefore, we need more money to live advanced one place to pass our leisure time with clean room and good cuisine besides retaining good sleep after watching fashion clothes too. The expenditure may bring up new tendency that helps us to fill up the normal and positive mood to work then due to obtaining higher GDP value. The unit that will make us to be rich-men is really hard and difficult task for us to learn and use the reasonable course to make the work with becoming interesting place to go almost five days one week. We should learn and upgrade new knowledge and technique skill in order to make it more achievement by our endeavour and insistence. All of our behavior and judgement can make the live more beneficial and make more money with some prize sometimes monthly and yearly. With regards to welcoming new world of artificial intelligence machine like auto-vendors that includes the automatic composition inside its internal-structure which makes our buying behavior more precious, quickly and conveniently like payment action by visiting one face. We should continue to search and develop many of them applied to the current leisure occasions for us to enjoy enough through buying its goods like many kinds of the cigarette & beers in visible place in

hospital roadside & community. Therefore, the sell & buy actions may let us fill with enough goods with quickly transacting course than human being because we just scan its two-dimensions bar code and determine the last payment button in monitor. So many of such AI machines have to change our daily life with less complaints and precise transformation action helped by those payment machines. On the other hand, the engineer must publish his cherish paper periodically like one paper speed within one~ three months, so that there will be six~ten papers one year that may be published & peer reviewed by editors in Journal Publisher. Certainly if there will be chances the sophisticated SCI (science cited index) & EI (engineering index) journals often are published that may influenced by the peers and may be cited by them as well if the similar theme appeared in the narration of those papers. Thereby, the enough high-technological achievement could be made by our scientists for revealing the internal attribution and finding outside our vision like quantum technique, drug compositions, astronautic exploration & 3-Dimensions print too.

Ethic Declarations

The authors declared that there were not conflicts of interest.

Funding

This paper was supported by the Korean Science & Engineering Fund (KSEF) at the granted No 96-0300-11-01-03, under the Specific Basis Research Program.
